Antaris Solar Opens New Jersey Office

in News Departments > FYI

by SI Staff on Tuesday 04 October 2011

Antaris Solar, an international provider of solar photovoltaic panels, has opened a satellite office in Bergen County, N.J., to service the region.

The company says it has seen demand rise with the increase in energy prices and the available solar rebates offered by the state.

With headquarters in Germany, Antaris also has subsidiaries in the U.S., Switzerland, the Czech Republic, Italy, France and the U.K.
